Hey Billy, ants do this too, it's called a death spiral or an ant mill. Where they get lost and unsure of where to go so they just follow one another in circles over and over until it's broken or they die of exhaustion

Trying to get a cyclone going in the pool, don't act like you didn't do this too

Circles nothing to worry about. If they were walking in the shape of a pentagram then we'd have problems

Just trying to get their steps in.
