i've just made, what might possibly be, the world's most failed banana bread. if i had feral goats living in my backyard, i would hesitate to feed it to them.

i will not be taking any questions at this time. thank you for respecting my privacy.

This is what it looks like. And it looks, and I can't stress this enough, better than it tastes.

Oh I almost forgot to put some blame where it rightly belongs - on the tweep who shared their perfect banana bread, thereby making me think I could produce the same outcome if I used the same recipe.

My banana bread was so bad that it made global media. Best part was they report my banana bread was in celebration of Easter.

As someone who turned egg puffs into stone, which even the birds wouldn't touch in the dead of winter, survived the house next door burning down

(which scorched the ground and twisted the main beam), and will someday be an archaeological puzzlement, I sympathize.

I used too little flour, I think. replaced some of it with bran flakes in a bid to be healthier....Ok, once I nurse my wounded ego, I will gather my strength, and try again with this recipe. And I always reduce sugar

Me: Going to rise soon?

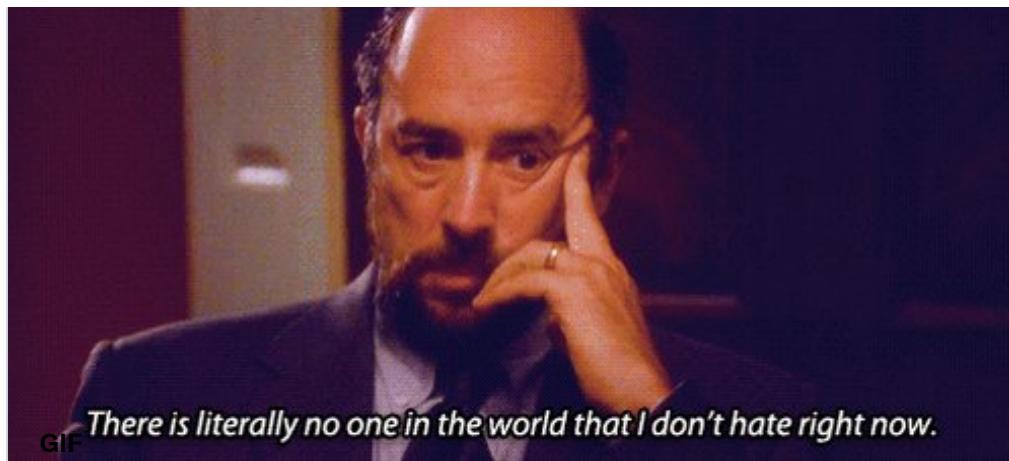

Bread: Nope.

Me: How about now?

Bread: Looks like you're just making some dough today.
