Christ... now people are hungry for more centaur content. Are you never satisfied?

Would you ride a centaur like this?

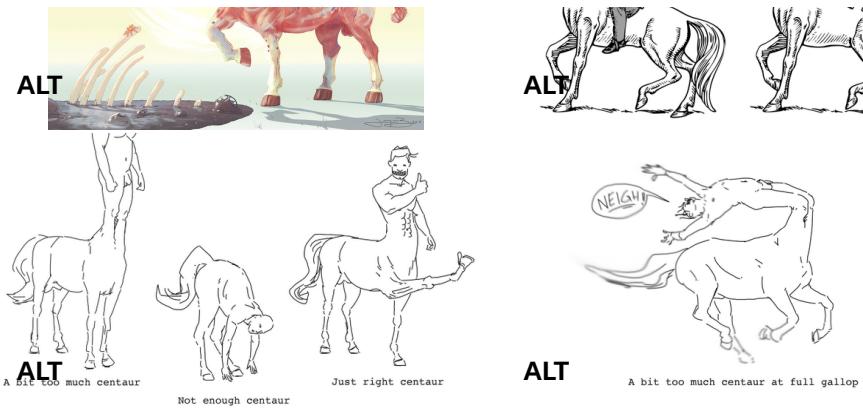

Or like this?

Joaquin Baldwin @joabaldwin · 3h

To those of you questioning if centaurs are insects: NO, they are arachnids. The two human legs are still there as vestigial bones under the skin, like how a whale still has them.

I see you have put a lot of thought into this, which is good! Sleeping positions (of mythological species or else) are an important scientific matter, that require more attention & resources to be pooled into.

Here's my own research on the topic:

The Tigerman @TigermanTweets · Aug 10, 2021

#SleeperTop or #SleeperBottom - Which one are you?

Just something dumb I came up with while working on the new comic page. Obviously not meant in any serious way.

Lookin at it all wrong dude.

Centaur 'Recliners'

Can be fancy and cushy

Or simple and supportive
with cushions added

Angle can be adjusted easily
for both comfort and
ease of transport

but most are made of
a wood frame with
a canvas 'hammock'

Recliners can be used alone
but are often paired with a
cushion of some sort for
the rest of the body

4

New mattress. The horse hole keeps your bones safe.

if you're like sleep spooning a centaur and they roll over
in bed do you just die

sleep on her back, then you'll just roll off if she shifts

i dont follow

okay but what if you had a special bed instead

3

If one has to wake up early to go work can the rest contort to a triangle?

[1](#)[1](#)[17](#)[↓](#)[↑](#)**Kugelwilli** @Kugelwilli · 3h[...](#)

Replying to @joabaldwin and @KHZockerin

why do so many ppl just assume, that the bend between the horse and human parts is static? have these ppl never seen a horse eat, or a person bend down to pick something up?

[1](#)[2](#)[2](#)[↓](#)[↑](#)**Joaquin Baldwin** @joabaldwin · 3h[...](#)

Replying to @Kugelwilli and @KHZockerin

Horses have to lift up their hind legs and balance on their two front legs to eat, because they can't bend like that. It's not very convenient, but that is how nature made them.

The first seems to make more sense because chests are closer together. Intimacy needs and hearts being closer and all. - The one on the right looks like the option you'd see if this couple were annoyed with each other but still craved intimacy or something. 🤦

Tea 🍵 NaNoWriMo 🖥 @merteazy · 8h
